

Ryan Consulting Group, Inc. (RYAN) is an award-winning, minority-owned, small, disadvantaged business specializing in professional IT services.

As organizations seek to deliver digital outcomes and modernize their IT infrastructure to transform their processes, new technologies generate more data that needs to be secured and harnessed to deliver better outcomes for their stakeholders.

Our **Audit-Ready operating approach** provides resources and coverage for components based on a holistic understanding of the **modern cybersecurity landscape** and are supported by a portfolio of innovative, next-generation security solutions.

RYAN's Cybersecurity Service capabilities are built on successful engagements across a portfolio of cybersecurity contracts that **protect mission critical assets** for major government agencies.

RYAN **defines, builds, tests, and implements solutions** that support client's security policies to prevent attacks that can result from by-passing technical security controls.

RYAN **plans, designs, implements, operates, maintains, and supports** systems and servers required to support on premises or cloud based operational systems.

For the Department of Energy's Southeastern Power Administration, RYAN **established a cloud hypervisor-based centralized management portal** that automated routine cybersecurity features and controls to save labor hours equivalent to 4 FTE.

RYAN's management of the **complex** Defense Contract Management Agency (DCMA) **global Cyber enterprise** assists them in achieving their **mission-critical** goals and objectives.

A key highlight of **our staffing, recruiting, and retention capability** is our experience over the last 14+ years supporting the DoD/Federal and DCMA cybersecurity contracts.

DCMA employs approximately **12,000 professionals with more than 800** distinct and supported employee **duty stations worldwide**.

RYAN's Cybersecurity Services

Insider Threat Monitoring	Real Time Incident Detection
Penetration Testing & Network Hardening	Vulnerability Analysis & Management
Certification & Accreditation	Digital Forensics
Identity Management & Protection	Enterprise Risk Assessment
Software & Data Assurance	Audit Preparation & Compliance Auditing
Network Vulnerability Management	End User Training

RYAN's Cybersecurity Experience

Contracting Agency	Years of Service # of Users	Enterprise Risk Assessment	Vulnerability Analysis	Network/Host Vulnerability Management	Security Certification & Authorization	Real Time Incident Detection	Audit Prep and Compliance

Validation of Our Capabilities

Customer Testimonial - DCMA Security Audit by DISA in September 2020 was 98.2 percent compliant.

“DCMA has significantly improved across all cybersecurity functional areas since their last CSSP inspection in May 2016. DCMA has well established policies and procedures and staff are well trained on their roles.” - *DISA's Lead Cybersecurity Auditor*

“THANK YOU for all of your hard work and ingenuity to get us to this point! We now have over 5000 DCMA machines on the F5 VPN solution. That is incredible!!! I've never in my history as a government employee seen such a quick and (so far) successful migration from one technology to another. WELL DONE!!!” - *DCMA Deputy Director for Western Region Command*
